3 TEAMING CENTRES OF EXCELLENCE
2 FUTURE & EMERGING TECHNOLOGIES**

Challenges in the Open Access Era

- New landscape in research with open access developments
- Need for new scientometrics and alternative metrics (Altmetrics)
- Big data can be created through open access and High Performance Computing needs are increasing
- Increasing involvement of citizens in science through co-creation activities
- High demand of scientific knowledge and research output by the business enterprise sector
- Need for well-designed and efficient open access policies at the organization, national & EU levels
